INTRODUCTION.

Statistics as to the number of inhabitants of the District of Columbia, by census districts and police precincts, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of the District of Columbia which are to be issued in the form of separate publications. The final reports of the Fourteenth Decennial Census, however, will present, for the District of Columbia as a whole, in addition to the statistical material in this bulletin, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes.

This bulletin consists of eight tables, which present statistics as to color or race, nativity, parentage, sex, school attendance, age, illiteracy, citizenship and country of birth of the foreign-born white population, and dwellings and families. Tables 6, 7, and 8 present statistics not only for the District of Columbia, which is coextensive with the city of Washington, but for the nine districts into which it has been divided for census purposes. The boundaries of these districts are shown by the map on page 6.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativ-

ity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.
